

8. *Requests* the Subsidiary Body for Scientific and Technological Advice to consider at its fifteenth session the initial results obtained from the actions taken pursuant to this decision and to report them to the Conference of the Parties at its seventh session with a view to considering any further action;

9. *Invites* Annex I Parties and interested international organizations to provide the necessary financial support for the workshops and other activities identified in this decision.

IV. IMPACT OF SINGLE PROJECTS ON EMISSIONS IN THE COMMITMENT PERIOD (DECISION 16/CP.4)
(Agenda item 7 (g))

[Draft decision -/CP.6¹²

Impact of single projects on emissions in the commitment period

The Conference of the Parties,

Recalling its decision 1/CP.3, paragraph 5 (d),

Having considered the conclusions of the Subsidiary Body for Scientific and Technological Advice at its resumed thirteenth session,¹³

Recognizing the importance of renewable energy in meeting the objective of the Convention,

1. *Decides* that, for the purpose of this decision, a single project is defined as an industrial process facility at a single site that has come into operation since 1990 or an expansion of an industrial process facility at a single site in operation in 1990;

2. *Decides* that, for the first commitment period, industrial process carbon dioxide emissions from a single project which adds in any one year of that period more than 5 per cent to the total carbon dioxide emissions in 1990 of a Party listed in Annex B to the Protocol, shall be reported separately and shall not be included in national totals to the extent that it would cause the Party to exceed its assigned amount, provided that:

(a) The total carbon dioxide emissions of the Party were less than 0.05 per cent of the total carbon dioxide emissions of Annex I Parties in 1990 calculated in accordance with the table contained in the annex to document FCCC/CP/1997/7/Add.1;

(b) Renewable energy is used, resulting in a reduction in greenhouse gas emissions per unit of production;

¹² This text was given restricted distribution at the first part of the sixth session, under the symbol FCCC/CP/2000/CRP.9.

¹³ FCCC/SBSTA/2000/14.

(c) Best environmental practice is followed and best available technology is used to minimize process emissions;

3. *Decides* that the total industrial process carbon dioxide emissions reported separately by a Party in accordance with paragraph 2 above shall not exceed [1.6] million tonnes carbon dioxide annually on the average during the first commitment period and can not be transferred by that Party or acquired by another Party under Articles 6 and 17 of the Kyoto Protocol;

4. *Requests* any Party that intends to avail itself of the provisions of this decision to notify the Conference of the Parties, prior to its seventh session, of its intention;

5. *Requests* any Party with projects which meet the requirements specified above, to report emission factors, total process emissions from these projects, and an estimate of the emission savings resulting from the use of renewable energy in these projects in their annual inventory submissions;

6. *Requests* the secretariat to compile the information submitted by Parties in accordance with paragraph 5 above, to provide comparisons with relevant emission factors reported by other Parties, and to report this information to the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol.]
