

**Annex 34****Registration****Scope of the review on****“Energy efficiency and fuel switching measures in the caustic soda and sodium cyanide plant at Vadodara complex of GACL” (0951)**

1. The Board agreed to undertake a review of the project activity “Energy efficiency and fuel switching measures in the caustic soda and sodium cyanide plant at Vadodara complex of GACL” (0951).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover an assessment to determine:
 - (a) whether the approved small-scale methodology AMS-III.B is applicable to the project activity, which involves the use of hydrogen as a fuel;
 - (b) whether the approved small-scale methodology AMS-III.B is correctly applied to the project activity; and
 - (c) the additionality of the proposed project activity, in particular the demonstration of the investment barrier.
