

Annex 70

Issuance

Scope of the review on

“Electricity generation by utilization of waste heat from calcined petroleum coke production process ” (1002)

1. The Board agreed to undertake a review of the project activity “Electricity generation by utilization of waste heat from calcined petroleum coke production process ” (1002).
2. The Board agreed that the scope of the review relating to issues associated with verification requirements shall cover an assessment to determine how the application and calculation of “steam apportioning factor” based on steam flow rate are appropriate to estimate the electricity generation and auxiliary consumption contributed by the CDM project activity.
