

**VIII. Methodological issues under the Kyoto Protocol**  
(Agenda item 8)

**A. Implications of the establishment of new hydrochlorofluorocarbon-22 (HCFC-22) facilities seeking to obtain certified emission reductions for the destruction of hydrofluorocarbon-23 (HFC-23)**

(Agenda item 8 (a))

114. The SBSTA noted that the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol (COP/MOP) recognized, in its decision 8/CMP.1, that issuing certified emission reductions (CERs) for the destruction of hydrofluorocarbon-23 (HFC-23) at new hydrochlorofluorocarbon-22 (HCFC-22) facilities could lead to higher global production of HCFC-22 and/or HFC-23 than would otherwise occur and that the clean development mechanism (CDM) should not lead to such increases.

115. The SBSTA considered the submissions from Parties contained in document FCCC/SBSTA/2006/MISC.11, elaborating on practical solutions to address the implications of the situation referred to in paragraph 114 above.

116. The SBSTA could not conclude its consideration of the issue.
