15:00

Encontro com o Prof. Martyn Poliakoff- Secretário de Assuntos Exteriores - Royal Society.

Local: PUC

18:15-20:00

Participar do Future Earth - research for global sustainability.

Assunto: Future Earth aims to work with policy-makers and other stakeholders to deliver the knowledge needed to enable societies to meet their sustainable development goals. It will provide an overarching interdisciplinary framework for mobilising global research efforts after Rio+20. The event will feature a lively debate among scientists, policy-makers and civil society on how this initiative can ensure that international science is truly collaborating with policy-makers and other stakeholders. Future Earth is a joint initiative of the International Council for Science (ICSU), the International Social Science Council (ISSC), the Belmont Forum, the United Nations Environment Programme (UNEP), the United Nations University (UNU), and the United Nations Educational, Scientific and Cultural Organization (UNESCO), with the World Meteorological Organization (WMO) as an observer. It will build on the strengths of the current Global Environmental Change Programmes: Diversitas, IGBP, IHDP and WCRP.

Local: PUC-RJ - Rua Marquês São Vicente - 225 - Gávea
