

W3

Clavister Wolf Series – high performance, excellent scalability and robust functionality

The Clavister W3 is highly suited as a security gateway for larger remote/branch offices or as an entry-level enterprise security gateway. The Clavister W3 delivers next-generation firewall security at a break-through price point, offering flexibility and robust features without compromising security.

The Clavister W3 is an ideal solution for any organization that need premium network security in a cost-effective package.

Key Features

Application Control

- Clavister W3 offers full support for Application Control, with over 1,000 applications and 5,000 application attributes, all easily managed as any other Clavister rules.

High Availability Support Included

- High Availability (HA) support is included for free. Buy a second Clavister W3 and configure them as a cluster. No hidden costs, no extra charge.

Choose your preferred subscription model

- Choose a subscription with everything included or one with just upgrades, 24/7 support, centralized management and hardware replacement. And it is available from 12 months to 60 months.

Key Benefits

Great value for money

- The Clavister W3 packs a lot of processing power into the beautiful, purpose-built 1U 19" rack mount. This cost-effective solution offers Gigabit firewall security for a wide range of network applications.

Easy to set up and use

- Setting up and configuring your Clavister W3 is easier than ever. With included support for Clavister InControl, Clavister Web Management and Clavister CLI, you choose your way of working. Personalized management—Clavister style.
