## ICGEB Research Grants 2015

### CRP - Collaborative Research Programme

## General Information & Conditions for Application

---

### Purpose & Subject Areas

The Collaborative Research Programme (CRP) – ICGEB Research Grant is a dedicated source of funding aimed at financing projects addressing original scientific problems of particular relevance for the host country.

The programme was established in 1988 with the aim of:

- stimulating collaborative research in ICGEB Member States and with the ICGEB Component laboratories
- promoting training of young scientists
- facilitating the creation of appropriate research facilities

The programme provides support for research projects in basic life sciences, human healthcare, industrial and agricultural biotechnology and bioenergy.

---

### Eligibility

Applicants for CRP – ICGEB Research Grant proposals should hold positions at Universities or Research Institutes in any of the Member States listed in Annex A.

Active collaboration with ICGEB Research Groups is welcome but is not mandatory.

Investigating groups do not qualify for submission of applications:

- if previously awarded projects have not been evaluated and satisfactorily concluded;
- if the University or Research Institute of the Principal Investigator is based in Italy.

A special category of **CRP-ICGEB Early Career Return Grants** is intended to fund young researchers with an outstanding track record, who have spent a minimum of 2 years abroad and have recently returned to an ICGEB Member State to establish their own independent laboratories.

Applicants for Early Career Return Grants should be no more than 40 years of age at the time of application.

Applicants should have returned to an ICGEB Member State (except Italy) no more than 2 years prior to submitting the application.

---

### Submission & Deadlines

Principal Investigators must submit their complete application by email (as a pdf file) to the ICGEB Liaison Officer (see Form A for name and full contact details) for endorsement\*, with a copy also to ICGEB (crp@icgeb.org).

The maximum number of project proposals that may be endorsed by each country is **three (3)**, for standard research grant applications, plus **two (2)** additional Early Career Return Grant applications. Liaison Officers will communicate to ICGEB, and to the applicants, the proposals they endorse for the present call.

*Continued/...*

The deadlines for submission of the applications are as follows:

**30 April 2015:** Deadline for submission by e-mail of the completed application forms (as a pdf file) to the ICGEB Liaison Officers for endorsement, with a copy also sent to ICGEB.

**31 May 2015:** Liaison Officers will communicate his/her endorsements to ICGEB and to the applicant.

**\*NOTE:** **Applicants that do not receive the necessary endorsement from their national Liaison Officers WILL NOT be considered for funding**

## Project Application Form

- Title and Abstract:** The abstract should be written in a clear, concise manner and explain the overall aims and approaches that will be taken. Principal Investigators should remember that this section is critical for aiding the selection of expert reviewers, and should therefore accurately reflect the content of the proposal.
- Introduction:** The introduction should provide a concise overview of the background to the project and highlight the question(s)/hypotheses that are to be addressed.
- Research Project:** This section should be structured in a clear and logical manner with clearly defined aims and milestones expected during the period of the project. Attention should also be paid to highlighting where collaborations with ICGEB groups or laboratories in ICGEB Member States are likely to help the implementation of the project.

## Type of Support

Grants are awarded to contribute to the implementation of outstanding scientific research projects. An important element of successful applications is the feasibility of the proposed project within the designated time-frame (maximum 36 months). The maximum annual contribution from ICGEB is Euro 25,000.

Funds can only be used to cover expenditures that are directly relevant to the project. This may include purchasing consumable items, scientific literature and basic standard laboratory equipment. Travel and training costs can also be covered.

Salaries of the Principal Investigators and infrastructural support (e.g., normal administrative and overhead expenses of the Institution, maintenance and rental of capital equipment, building, etc.) are not admissible and cannot be funded.

An estimate of the foreseen expenditure must be described on page 8 of the application form.

## Evaluation & Award Notices

The evaluation is based on a two-tier procedure: in the first phase all proposals will be reviewed by a Committee of 4 internationally recognized experts, who will triage all the applications and select those for the second phase of review.

The projects passed to the second phase will be sent out for peer-review by independent external experts. On the basis of the peer-review evaluations an ICGEB Committee will select the proposals to be funded for 2015.

All applicants will be notified of the outcome of each phase of the review by e-mail. The successful projects will start in January 2016.

## Agreement

In case of a grant being awarded, a written operational agreement is made between ICGEB and the Principal Investigator's Institute, in which the Institute undertakes to administer the grant according to the agreement and to provide the necessary support for the Principal Investigator during the entire lifespan of the project.

Equipment, material and literature purchased for the project through the CRP-ICGEB Research Grant funding programme should remain the property of the Institute after the project is completed. The ICGEB funding contribution should be acknowledged, as applicable.

*Continued/...*

The grant is paid in three, yearly instalments to the bank account of the Institute and the first payment is transferred upon signature of the agreement by both parties. Release of 2<sup>nd</sup> and 3<sup>rd</sup> year funds is subject to the satisfactory approval of annual reports submitted in a timely manner, according to the deadline and format specified in the agreement.

Please note that no part of the grant can be transferred to any other Institution or organisation under any form of sub-contracting or out-sourcing arrangement.

## Budget Guidelines

The ICGEB funds will only cover the part of the research being performed in the laboratory of the Principal Investigator. The funds may be used for the following four budget categories:

### EQUIPMENT

This budget category **must not exceed 30%** of the total grant requested/awarded.

It is to be spent preferably during the first year of the project for the purchase of basic standard laboratory equipment and/or components that are necessary for the implementation of the research project. Each piece of equipment purchased with the ICGEB grant will be the property of the beneficiary Institution and must remain with the latter.

The following items are **NOT FUNDED** by ICGEB:

- Purchase of major equipment (i.e., equipment costing more than Euro 10,000), office furniture or fittings, computer hardware or software;
- Depreciation, regardless of whether the equipment belongs to the Institute or was purchased with the ICGEB funds;
- Small pieces of equipment of the value of Euro 500 or less (e.g., micropipettes). These are to be considered as consumables and charged to that budget line accordingly

### CONSUMABLES & TRAINING

This budget category is intended to cover:

- purchase of consumable items (e.g., laboratory materials, office supplies such as stationery, etc.);
- short-term training visits of scientists directly involved in the project for hands-on training related to the project;
- stipends for long-term trainees from other ICGEB Member Countries (i.e., not nationals of the country to which the ICGEB grant has been awarded) working on the project.

### TRAVEL

This budget category **must not exceed 10%** of the total grant requested/awarded.

It is intended to cover the participation of scientists, directly involved in the project, in major conferences/meetings related to the project objectives.

### LITERATURE

This budget category **must not exceed 5%** of the total grant requested/awarded.

Funds may be used to cover:

- purchasing costs of scientific literature and reference material (e.g., books, subscription to journals and periodicals);
- publication costs of scientific manuscripts pertinent to the project in peer-reviewed journals (e.g., page charges and publication fees).

### COSTS NOT FUNDED BY ICGEB

- cost of maintenance, repair, running or insurance of existing equipment and machinery belonging to the Institution;
- cost of construction of new buildings or alterations and modifications of existing buildings and premises;
- normal administrative and overhead expenses of the Institution;
- bank charges;
- secretarial expenses;
- salary support of Principal Investigator;
- any other expenses not covered in the four budget categories mentioned above.
